WeCode/KC
“Coding a Pipeline of Future-Ready Tech Professionals.”
WWW.WECODEKC.ORG
Tammy Buckner is the Founder and CEO of WeCode KC. She fearlessly advocates for developing an inclusive and equitable technology industry, closing the black tech talent gap; unleashing the potential of those historically left out of the technology industry. She founded a minority women-owned technology solutions company specializing in innovative software, application development, DevOps and business systems analysis to improve business processes. Tammy has an undeniable calling to share her considerable education and technology experience with youth from underrepresented communities.

www.wecodekc.org
Our mission is to give youth the opportunity to learn technology concepts, and leadership skills; creating a pipeline of future-ready professionals through project-based learning and innovative programs. We're an initiative that serves the urban core of Kansas City, exposing youth to various computer science concepts. Every child, no matter their zip code or their family's financial status, should have the opportunity to learn to code.
WeCode KC Futures provides scholars ages 7-17 with the opportunity to start coding and learn software programming skills through project-based learning, developing a passion for technology.

WeCode KC Careers, provides young adults ages 18 - 26 the opportunity to earn technical and cybersecurity certifications to enhance their career opportunities through real-world learning, preparing them for college, entrepreneurship or the workforce.
